[Aspiring Cybersecurity Analyst | SOC Enthusiast | BSCS Student]

## > WHOAMI

Motivated Computer Science student with a "Capture The Flag" mindset. Combining **10+ months of high-pressure international operations** experience with active training in **SOC operations** and **Malware Analysis**. Expert in managing night-shift workflows and real-time troubleshooting—skills directly transferable to 24/7 Security Operations Center monitoring.

## > TECHNICAL\_SKILLSET

- **Cybersecurity:** **SOC Level 1 (THM)**, System Enumeration, Log Analysis, Phishing Defense.
- **Operational:** **Linux Terminal**, Traffic Monitoring, Virtualized Lab Management (VMware).
- **Communication:** Professional English Proficiency (Fluent), International Negotiation.
- **Creative:** **Graphic Design**, Visual Branding, Markdown, Git/GitHub Version Control.

## > PROFESSIONAL\_EXPERIENCE

### Freight Dispatcher (US Night Shift)

March 2024 – June 2024

*International Campaign — Lahore, Pakistan*

- Coordinated US-based logistics during night hours, maintaining 100% operational uptime.
- Acted as the primary English-speaking point of contact for US brokers and drivers.

### Vehicle Brokerage Specialist

July 2023 – Jan 2024

*Independent Operations — Lahore, Pakistan*

- Acted as an independent vehicle broker, connecting customers (buyers) with car hauling/transport companies for international vehicle movement.
- Negotiated rates, terms, and schedules between buyers and multiple hauling carriers to secure the best deals.
- Prepared and maintained all required digital documentation, contracts, and compliance records for cross-border vehicle transport.

### Customer Support Agent (Live Chat)

Dec 2024 – Feb 2025

*International Support Center — Lahore, Pakistan*

- Provided real-time technical support to international users, resolving queries via live chat.
- Maintained high satisfaction ratings through speed, professionalism, and efficient troubleshooting.

## > FEATURED\_PROJECTS

### Personal Digital Portfolio

fawaz951-mal.github.io

*Developed a responsive hub to document cybersecurity journey and technical write-ups.*

- Built using HTML5, CSS3, Bootstrap5 and JavaScript; deployed via GitHub Pages.
- Focused on clean UI/UX and dark-themed visual composition.

## > TRAINING\_LABS

- **Hack The Box:** Actively solving **Starting Point** and **Tier 1** machines; focusing on Nmap.
- **TryHackMe:** Completing **SOC Level 1 Path**; practicing with Splunk and Wireshark.
- **Virtual Lab:** Configured isolated environment for Linux administration and security monitoring.

> EDUCATION
